

## CRATES BY PARCEL POST.

Size of Packages Increased So as to include them.

WASHINGTON, July 14.—Postmaster General Burdett issued orders to-day increasing the length of the parcel post package and providing for a receipt for articles mailed. The increase is from 32 inches in length and 4 inches in width to 44 inches. This action follows a widespread demand and the principal effect is to bring the commercial rates within the regulations.

## 80% of the Population of the U. S.

live in rural districts remote from physicians or drug stores, and they are obliged to depend upon proprietary medicines to a very great extent.

To the women in these homes, such standard remedies as Lydia E. Pinkham's Vegetable Compound come as a boon and a blessing. Records show that it has cured more women of those dread feminine ills than any other remedy.

## AUTO DEATH LIST IN CITY FOR JUNE HAD 34 VICTIMS

Health Department Urges Stricter Laws for Those Driving Machines.

Figures prepared by the Bureau of Records of the Department of Health, issued to-day, show that during June, 1915, thirty-four persons were killed on the streets of New York City by automobiles, an increase of 70 per cent. over the number during June, 1914.

During the first six months of 1915 162 lives were lost.

The Health Department urges the people to demand uniform standards for all who operate motor vehicles and more stringent enforcement of existing regulations. It adds:

"The Department points out that the control of an automobile in the streets is not a task for a child, an untrained amateur, a neurotic, an excitable person or a weakling. In the hands of such persons a motor vehicle is an engine of death. It is the clear duty of the authorities then to see that the competency and trustworthiness of every would-be operator is satisfactorily established. How does the Legislature perform this duty? By the enactment of a statute which requires no test of an owner's capacity and which expressly prohibits any local authority from enacting supplementary protective regulations."

"Under the Highway Law of the State of New York any owner or any member of the family of an owner is permitted to drive a motor car. The question of mental or physical capacity does not enter, and yet there is not the slightest doubt about the risk involved."

## "THE BROKEN COIN IS THRILLING"

The Universal's new film serial, "The Broken Coin," has, in theatrical parlance, "amassed all box office records." The public has been closely following the adventures of the principals in the serial, Grace Cunard and Francis Ford, through the columns of The Evening World, where the play has been running in serial form. Emerson Hough has written a story based on his original moving picture

scenario which ranks with his best work. Five episodes of the serial so far have been released and each one has exceeded the preceding in dramatic interest. The scene is a mythical Balkan principality where automobiles, flying machines and the modern engines of war are everywhere in evidence.

WHERE THE SHORTAGE IS. (From the Houston Post.) Of course there will be people to criticize the creation of new offices, but they ought to remember that this is a government of the people and that so far there are not nearly enough offices to go around.

## What to Do to Get Fat and Increase Weight

The Real Cause of Thinness

Most thin people eat from four to six pounds of good solid fat-making food every day and still do not increase in weight one ounce. While on the other hand many of the plump, chunky folks eat very lightly and keep gaining all the time. It is all down to the nature of the individual. It isn't Nature's way at all.

This is because their powers of assimilation are defective. They absorb just enough of the food they eat to maintain life and the semblance of health and strength. Stuffed won't help them. A dozen meals a day won't make them gain a single "meat" pound. All the fat-producing elements of their food just stay in the intestines until they pass from the body as waste. What such people need is something that will prevent the food elements so that their blood can absorb them and deposit them all about the body—something, too, that will multiply their red blood corpuscles and increase their blood-carrying power.

For such a condition I always recommend eating a Sargol tablet with every meal. Sargol is not, as some believe, a patented drug, but is a scientific combination of six most effective and powerful elements known to chemistry. It is absolutely harmless, yet wonderfully effective, and a single tablet eaten with each meal often has the effect of increasing the weight of a thin man or woman from three to five pounds a week. Sargol is sold by all good druggists everywhere on a positive guarantee of weight increase or money back—Advt.

## CIVIL SERVICE.
